

Planetrehab Documentation Rewrite

January 24th, 2016

In an effort to simplify the template system in Planetrehab, we have completely rewritten the template database. We have overhauled the existing template database and we have added new templates.

We focused heavily on making the templates easier to use and customize while retaining the flexibility that Planetrehab offers. The new system combines most sections that were previously separated (the green lines when entering info into the note). Most templates now have 4 to 6 sections to edit instead of a separate line for each field. This will allow users to easily add and/or delete data and easily navigate the note.

We will not update each user's database unless we are specifically asked to because the update will change your existing template database. We are able to merge the new templates but your existing templates will be renamed. You have to call 800-982-5447 extension 314 and request the new template system.

We have produced 10 separate booklets with each template printed so you can see what the template looks like when printed. We have also produced a short video demonstrating the difference between an existing template and a new template. All Planetrehab users can download the booklets and view the video by going to www.planetrehab.com and clicking on the globe icon in the lower right hand corner on the home page or by clicking this [link](#). You will be transferred to the Sample Templates Download page and you will have to enter the password to access the page. The password is pruser.
