

Planetrehab 2.393 Release Note

March 11th, 2018

We have added two new valuable reports. You will find the new reports in File>Reports & Queries>Operations.

The first report is called **Patients Not Paid Between Dates**. This report gives you all the patients who have not paid anything between two dates. You can use this report to find out how many patients failed to pay anything in 2017.

The second report is called **Patients with Balance Between Dates**. This report will give you all patients that have a patient owed balance between two dates. This report can be used to find out if any of the patients you have scheduled for appointments for a specific date (e.g. tomorrow) have a patient owed balance.
